WORKlink

The image below is the default "marker" or "imagetarget" for the WorkLink augmented reality application. If you don't yet have the app installed, go to scopeAR.com/demo to install the app and use it with the marker below.

Print this sheet out at 100% (normal) size and have it handy when you run WorkLink so you can view content by pointing your device's camera at it.

 SCOPE AR   scopeAR.com   **WORK**link
